

### PROJECT NAME: Exploratory Data Analysis

- I had Undergone the Exploratory Analysis for the Sales data
- Firstly, I cleaned and Handled the Missing Values Using the fillna methods
- Secondly, I undergone the Univariate Analysis, Bivariate Analysis and Multivariate Analysis
- Firstly, doing the univariate Analysis for Categorical Values, for it is distribution, then I done the analysis for the Region Managers as Univariate Analysis (By producing we can identify the count of the Products and the sales That had made and also done the univariate analysis for the Payment Method
- By doing the Univariate Analysis and Bivariate Analysis and Multivariate Analysis helps to find the relationship between the variables and compute to derive the sales patterns based on the various factors

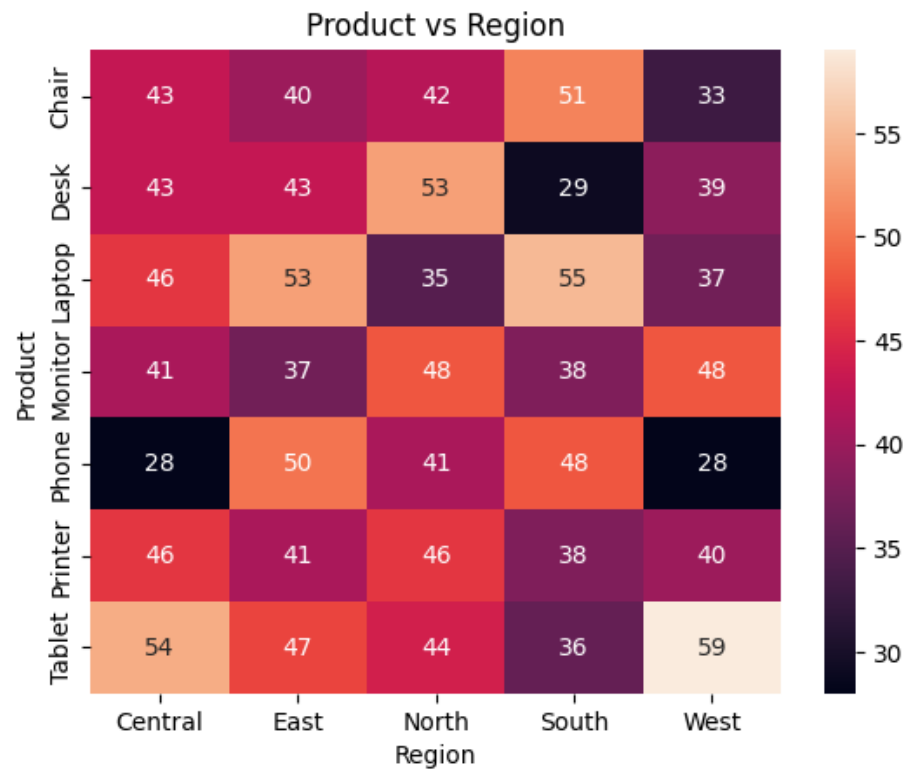

Proof:

Univariate Analysis- Categorical

Univariate-Numerical

Bivariate Analysis

## Multi variate Analysis:
